

1. Record Nr.	UNIORUON00269390
Autore	NAGEL, Joane
Titolo	Race, ethnicity and sexuality : intimate intersection, forbidden frontiers / Joane Nagel
Pubbl/distr/stampa	Oxford, : Oxford University press, 2003
ISBN	01-951274-7-1
Descrizione fisica	XII, 308 p. : ill. ; 24 cm.
Disciplina	305.8
Soggetti	NAZIONALISMO ETNICITA' SESSO RAZZA
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910574069803321
Autore	Pourmorad Saeid
Titolo	Alluvial Fans in Southern Iran : Geological, Environmental and Remote Sensing Analyses // by Saeid Pourmorad, Ashutosh Mohanty
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2022
ISBN	981-19-2045-1
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (220 p.)
Collana	Advances in Geographical and Environmental Sciences, , 2198-3550
Disciplina	551.4
Soggetti	Physical geography Sedimentology Petrology Geochemistry Geology Physical Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Geology of the study area -- Advanced sedimentology studies -- Petrographic and geochemical studies -- Tectonic and morphotectonic studies -- Environmental geological studies -- Remote sensing studies -- Basin analysis and modeling. .
Sommario/riassunto	This book presents a complete set of studies of alluvial fan sediments in southern Iran from the point of view of sedimentology, sedimentary geochemistry, tectonics, economic geology, groundwater, geomorphology, hazards and telemetry. In addition, the book focuses on advanced topics and theory, which practically serves as a model for the study of this type of sediment around the world. Alluvial fans are an important and fundamental factor in many sciences such as geology, environmental science, natural hazards, groundwater science, agriculture and many other related sciences. Lack of accurate knowledge of their constituent sediments has always been an important problem for experts in many science disciplines. From the economic point of view, the identification of alluvial fan deposits is of particular importance. For example, alluvial deposits are the centre of groundwater accumulation, and most groundwater reservoirs within the

sedimentary basin are fed by water from alluvial deposits. Most of the gold production in South Africa has been formed as placer deposits in ancient alluvial fans. In addition, a large amount of uranium placer deposits is extracted from old alluvial fans in sedimentary basins in South Africa. This book serves as an ideal guide for experts in earth and environmental sciences and hydrology.
