

1. Record Nr.	UNIORUON00336904
Titolo	Identifying people in the past / edited by E. A. Wrigley
Pubbl/distr/stampa	London, : Arnold, 1973
ISBN	07-13-15694-5
Descrizione fisica	159 p : ill. ; 24 cm
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910349451303321
Titolo	Advances in Biomedicine / / edited by Mieczyslaw Pokorski
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-25373-2
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (120 pages)
Collana	Clinical and Experimental Biomedicine, , 2523-3769 ; ; 1176
Disciplina	615.854
Soggetti	Molecular biology Cardiology Cancer - Research Cytology Molecular Medicine Cancer Research Cell Biology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Increased Risk of Lung Metastases in Patients with Giant Cell Bone Tumors: A Systematic Review -- Acceptance of Illness Associates with Better Quality of Life in Patients with Non-malignant Pulmonary

Diseases -- Heart Rate Variability in the Diagnostics and CPAP
Treatment of Obstructive Sleep Apnea -- Subterranean Pulmonary Rehabilitation in Chronic Obstructive Pulmonary Disease --
Epidemiological Aspects of Low Back Pain -- Sex Hormones Response to Physical Hyperoxic and Hyperbaric Stress in Male Scuba Divers: a Pilot Study -- Cigarette Smoke-induced Oxidative Stress and Autophagy in Human Alveolar Epithelial Cell Line (A549 Cells) --
Relative Cerebral Blood Transit Time Decline and Neurological Improvement in Patients after Internal Carotid Artery Stenting --
Influence of Glycemic Control and Coagulation and Lipid Metabolism in Pregnancies Complicated by Pregestational and Gestational Diabetes Mellitus -- Maternal Nutritional and Water Homeostasis as a Presage of Fetal Birth Weight -- Cytotoxicity, Oxidative Stress and Autophagy in Human Alveolar Epithelial Cell Line (A549 Cells) Exposed to Standardized Urban Dust -- Autologous Platelet-Rich Plasma Reduces Healing Time of Chronic Venous Leg Ulcers: A Prospective Observational Study.

Sommario/riassunto

This book gathers multidisciplinary articles that present advances of our understanding of diseases and the effective treatment of patients. The authors share recent clinical and experimental research findings, highlighting poorly understood areas with uncertain treatment outcomes, such as giant-cell bone tumors and their propensity to metastasize to the lungs; subterranean rehabilitation in pulmonary disorders; male reproductive hormone regulation during physical exercise in hyperbaric, hyperoxic environments, like underwater diving; and amelioration of cognitive decline owing to increased cerebral blood transit time after internal carotid artery stenting. Other topics include new concepts and innovations in the treatment of diabetes in pregnancy, and leg ulcers in chronic venous insufficiency, as well as molecular research on the toxic effects of oxidative stress, impaired cell autophagy, and experimental conditions resembling air pollution. Featuring the latest interdisciplinary advances in biomedicine, this book is a valuable resource for medical professionals, both academics and practitioners, and all allied health-care workers.
