of Agricultural Biotechnology -- The Political Context in the United States -- The Political Context in Canada -- The Scientific Debate -- Conclusion -- Notes -- Bibliography -- Index

Sommario/riassunto

She examines the decision-making processes at Monsanto that led to their making the drug available and discusses corporate, academic, and regulatory decision-making in the context of a restructured global political economy for agriculture. Mills shows that there was consensus about the scientific evidence but interpretation of that evidence differed depending on the context from which it was viewed. Scientists who analysed it for regulatory bodies interpreted it differently than scientists in corporate or academic institutions, and scientists in Canada and Europe interpreted it differently than those in the United States. In the United States it was assumed that any problems arising from its use could be taken care of within the existing dairy system; in Canada and Europe these problems were regarded as legitimate animal welfare issues. While all regulatory bodies agreed that human health problems were unlikely, in Canada the Health Protection Branch questioned this, but ultimately rejected the drug on animal health grounds.

3. Record Nr.	UNIORUON00408441
Autore	RAKOVSKIJ, Leontij
Titolo	Admiral Usakov : Istorieskij roman / Leontij Rakovskij
Pubbl/distr/stampa	Moskva, : Chudožestvennaja literatura, 1955
Descrizione fisica	312 p. : 1 tav. ; 21 cm.
Disciplina	891.734
Lingua di pubblicazione	Russo
