behavioral and cognitive performance in nonhuman primates --
Planning abilities of monkeys -- Neuropeptides in the monkey
brainstem -- Developmental neuronal toxicity and the rhesus monkey
-- Visual processing in the monkey.

Sommario/riassunto

Focuses on the biology, behaviours and disorders of monkeys. This book discusses topics that include the use of non-human primates in biogerontology; cognitive correlates of communication in primates; effects of the adverse rearing experience on the organisation of the brain and behaviour among non-human primates; and, more.
