Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This textbook provides a compelling and structured introduction to international environmental law in the Text, Cases and Materials genre. The book uses extracts from a judiciously selected range of legal instruments and case law relevant to the protection and regulation of the environment in international law, alongside commentary from the author team and questions for class discussion, to facilitate student understanding and encourage engagement in the topic. Divided into four main parts, it examines the main principles of international environmental law, the key areas of substantive environmental regulation, the implementation of environmental law and the relations between environmental law and other areas of international law.
