Sommario/riassunto

On croit souvent que les interventions en psychomotricité se cantonnent à une salle de mouvement munie de multiples objets comme des ballons, foulards, cerceaux et plots. Toutefois, au-delà d'activités thérapeutiques, l'expertise psychomotrice s'inscrit aussi au cœur de la collectivité grâce à des modalités novatrices et variées. En mettant le corps et le mouvement sur le devant de la scène, l'approche psychomotrice, déployée dans des contextes communautaires, sportifs, éducatifs, pédagogiques ou de loisir, offre l'opportunité d'appréhender un processus de prévention prévenante. Les dispositifs présentés dans ce livre promeuvent des expériences propices au développement de la personne, tant en termes d'estime de soi, de pouvoir d'agir, que de capacité à entrer en relation. L'interprofessionnalité qui émane de ces pratiques - comme but en soi ou inscrite dans un cadre institutionnel - est une forme de réponse à la complexité des situations sur les terrains. Les chercheur-e-s, les professionnel-le-s et les étudiant-e-s des domaines de la psychomotricité, du travail social en général, de la petite enfance et des milieux sportifs trouveront dans ces contributions des exemples de prévention émancipateurs et insolites.

Sommario/riassunto

This 2013 Article IV Consultation for Albania focuses on economic developments and policies that have led to weakening and imbalance of the economy. It highlights that high nonperforming loans (NPLs) are constraining credit growth, and weak external drivers are preventing a sustained reduction in external imbalances. Reduction in NPLs would safeguard financial stability and help release credit supply constraints by lowering bank risk aversion. The authorities have requested a three-year arrangement with proposed access equivalent to SDR 295.42 million.
