Chapter 1 Why is Patient-Centered Culturally Competent Care important? -- Chapter 2 Establishing Trust When Many African Americans Mistrust Healthcare -- Chapter 3 Bias and its Impact on Clinical Decision-Making -- Chapter 4 How Emotional and Cultural Intelligence Can Improve Your Clinical Care Delivery -- Chapter 5 Important Differences in Cardiovascular Care -- Chapter 6 Important Differences in Diabetes Care and Obesity -- Chapter 7 Important Differences in Cancer -- Chapter 8 Important Differences in Renal Disease -- Chapter 9 Important Differences in Rheumatological Diseases -- Chapter 10 Important Differences in Pulmonary Diseases -- Chapter 11 Important Differences in Laboratory Results and Hematological Diseases -- Chapter 12 Sickle Cell Disease -- Chapter 13 Important Differences in Gastrointestinal Diseases -- Chapter 14 Dietary Differences and Ways to Impact Care -- Chapter 15 Important Differences and Disparities in Pain -- Chapter 16 Connecting with Stories: Improving Patient Adherence -- Addiction Medicine and the African American -- An Oath and a Responsibility.

This new edition is an easy-to-read guide outlining specific differences in communication, clinical therapies, medications, protocols, and other critical precision medicine approaches to the care of African Americans. African Americans still face significant health disparities in the United States across numerous health measures. Despite their uniquely poor health outcomes, no other book has taken a laser focus on this community and shed light on best practices based on confirmed and replicated research outcomes. From cardiovascular disease to cancer, the physiology, pharmacology, prevention, and other interventions are, in many cases, uniquely different for African Americans. As such, the optimal approach to achieving the best outcomes is different. This updated edition expands on the success of the first with a distinct precision medicine approach. Data is updated throughout to improve and refine the perspectives given. New sections have been added covering bias, pain, emotional and cultural intelligence, and sickle cell disease. Updated, expanded, and including more specialists in their field, this second edition advances approaches and practices that continue to benefit the clinical care of African Americans.

| Nota di contenuto       | Accessibility for the deaf and hard-of-hearing -- interaction techniques for motor disabled users; augmentative and alternative communication innovations in products and services, cognitive disabilities, assistive technologies and accessibility -- dyslexia, reading/writing disorders: assistive technology and accessibility; accessible, smart, and integrated healthcare systems for elderly and disabled people -- assistive technologies and inclusion for older people -- advanced technologies for innovating including and participation in labour, education, and everyday life; disability, inclusion, service provision, policy and legislation. |
| Sommario/riassunto      | The two-volume set LNCS 14750 and 14751 constitutes the refereed proceedings of the International Conference on Computers Helping People with Special Needs, ICCHP 2024, which took place in Linz,                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Austria, during July 8-12, 2024. The 104 full papers included in the proceedings were carefully reviewed and selected from a total of 266 submission. They were organized in topical sections as follows: Part I: Software, Web and document accessibility; making entertainment content more inclusive; art Karshmer lectures in access to mathemtaics, science and engineering; tactile graphics and 3D models for blind people and shape recognition by touch; new methods for creating accessible material in higher education; ICT to support inclusive education - universal learning design (ULD); blind and low vision: orientation and mobility; blindness, low vision: new approaches to perception and ICT mediation; Part II: Accessibility for the deaf and hard-of-hearing; interaction techniques for motor disabled users; augmentative and alternative communication innovations in products and services, cognitive disabilities, assistive technologies and accessibility; dyslexia, reading/writing disorders: assistive technology and accessibility; accessible, smart, and integrated healthcare systems for elderly and disabled people; assistive technologies and inclusion for older people; advanced technologies for innovating including and participation in labour, education, and everyday life; disability, inclusion, service provision, policy and legislation.
