Sommario/riassunto	When is preventive war chosen to counter nuclear proliferation? In 'All Options on the Table', Rachel Elizabeth Whitlark looks beyond systemic and slow-moving factors such as the distribution of power. Instead, she highlights individual leaders' beliefs to explain when preventive military force is the preferred strategy. Executive perspective - not institutional structure - is paramount. Whitlark makes her argument through archivally based comparative case studies. She focuses on executive decision making regarding nuclear programs in China, North Korea, Iraq, Pakistan and Syria.
