Sommario/riassunto

Ce recueil de conférences dédié à la mémoire d'Yvette Conry aborde le problème du toucher sous l'angle – les angles, faudrait-il dire – de l'histoire des idées : philosophie et histoire des sciences y recourent leurs trajectoires. Au départ du livre figurent Hippocrate et Aristote selon lesquels l'homme est, des êtres vivants, celui qui bénéficie du sens du toucher le plus subtil. L'Antiquité Tardive insiste sur l'aspect à la fois physiologique et moral, selon une perspective où le salut de l'homme entre en jeu. Condillac ensuite : le toucher est-il le principe unique susceptible de doter le sensualisme de la seule systématité fondée en raison ? La conclusion est donnée par la phénoménologie et Merleau-Ponty, qui médite sur le « je ne réussis pas tout à fait à me toucher touchant ». Donc un recueil volontairement éclectique, qui balaie de quelques coups de projecteur le vaste champ du toucher et évoque quelques réponses.

Sommario/riassunto	The Southern African Customs Union (SACU) is the oldest customs union in the world, with significant opportunities ahead for creating higher economic growth and increased welfare benefits to the people of the region, by fulfilling its vision to become an economic community with a common market and monetary union. This volume describes policy options to address the barriers to equitable and sustainable development in the region and outlines a plan for deeper regional integration.
