Sommario/riassunto

Transfer Boy: Perspectives on Asperger Syndrome explores what it is
like to be an adolescent with Asperger Syndrome, through interviews
with Teodor, a 'psychologically unusual' twelve-year-old. In this
detailed case study, Vuletic and Ferrari combine an autobiographical
account with perspectives from other family members and people who
know Teodor well, while simultaneously integrating psychiatric and
psychological research on autism. The authors evaluate the merits and
pitfalls of different interpretations of autism and address the broad
psychological issues related to Asperger Syndrome.
