

1. Record Nr.	UNIPARTHENOPE000028406
Autore	Ben Jelloun, Tahar
Titolo	Partir / Tahar Ben Jelloun
Pubbl/distr/stampa	Paris : Gallimard, c2006 (, 2007)
Titolo uniforme	Partir
ISBN	978-2-07-034431-4
Descrizione fisica	333 p. ; 18 cm.
Collana	Collection Folio
Disciplina	892
Collocazione	P1 892-P/1
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910412154503321
Titolo	Solar Cells and Modules // edited by Arvind Shah
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-46487-3
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XX, 346 p. 225 illus., 176 illus. in color.)
Collana	Springer Series in Materials Science, , 0933-033X ; ; 301
Disciplina	621.31244 621.381542
Soggetti	Surfaces (Physics) Interfaces (Physical sciences) Thin films Energy policy Optical materials Electronics - Materials Semiconductors Surface and Interface Science, Thin Films Energy Policy, Economics and Management Optical and Electronic Materials

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Solar Irradiation (and other Illumination Conditions) -- Theory of the p-i-n Solar Cell -- Amorphous and Microcrystalline Silicon -- Contact Layers, TCO Layers and Light Trapping -- Thin-Film Silicon Solar Cell Design Options -- Thin-Film Silicon Solar Cell Performance -- Thin-Film Silicon Solar Panels and Modules -- Module Fabrication Issues (Including Encapsulation) -- Module Testing: STC and Field Performance -- Application Aspects -- Life Cycle Analysis.
Sommario/riassunto	<p>This book gives a comprehensive introduction to the field of photovoltaic (PV) solar cells and modules. In thirteen chapters, it addresses a wide range of topics including the spectrum of light received by PV devices, the basic functioning of a solar cell, and the physical factors limiting the efficiency of solar cells. It places particular emphasis on crystalline silicon solar cells and modules, which constitute today more than 90 % of all modules sold worldwide. Describing in great detail both the manufacturing process and resulting module performance, the book also touches on the newest developments in this sector, such as Tunnel Oxide Passivated Contact (TOPCON) and heterojunction modules, while dedicating a major chapter to general questions of module design and fabrication. Overall, it presents the essential theoretical and practical concepts of PV solar cells and modules in an easy-to-understand manner and discusses current challenges facing the global research and development community.</p>
