

1. Record Nr.	UNISA990000082320203316
Titolo	Cile : i contesti di riferimento per ogni attività economica / a cura di Alberto Brugnoli
Pubbl/distr/stampa	Milano : EGEA, copyr. 2000
ISBN	88-238-0561-9
Descrizione fisica	183 p. ; 23 cm
Collana	Le guide paese
Disciplina	330.989
Collocazione	330.989 CIL 1 (IEP III 640)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNISA996464536603316
Autore	Fisman Dana
Titolo	Tools and algorithms for the construction and analysis of systems : 28th International Conference, TACAS 2022, held as part of the European Joint Conferences on Theory and Practice of Software, ETAPS 2022, Munich, Germany, April 2-7, 2022, Proceedings / editors, Dana Fisman, Grigore Rosu
Pubbl/distr/stampa	Cham, : Springer International Publishing AG, 2022
ISBN	3-030-99524-0
Descrizione fisica	1 online resource (xxii, 583 pages) : illustrations
Collana	Lecture notes in computer science ; v.13243
Altri autori (Persone)	FismanDana RosuGrigore
Soggetti	Computer software - Verification System analysis System design
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.

Includes author index.

## Sommario/riassunto

This open access book constitutes the proceedings of the 28th International Conference on Tools and Algorithms for the Construction and Analysis of Systems, TACAS 2022, which was held during April 2-7, 2022, in Munich, Germany, as part of the European Joint Conferences on Theory and Practice of Software, ETAPS 2022. The 46 full papers and 4 short papers presented in this volume were carefully reviewed and selected from 159 submissions. The proceedings also contain 16 tool papers of the affiliated competition SV-Comp and 1 paper consisting of the competition report. TACAS is a forum for researchers, developers, and users interested in rigorously based tools and algorithms for the construction and analysis of systems. The conference aims to bridge the gaps between different communities with this common interest and to support them in their quest to improve the utility, reliability, flexibility, and efficiency of tools and algorithms for building computer-controlled systems.
