Nota di contenuto

A Multidimensional Exploration of Hidden Burden of Rheumatoid Arthritis from Joints to Genes -- Exploring Techniques for Detecting Copy-Move Forgeries in Digital Images: A Concise Survey -- Effective Authentication Methods for Wireless Body Area Networks -- Design and Implementation of a 20ps High-Resolution Time Interval Counter for NavIC Timing Facility -- Attitude Analysis for Fault Prediction of Autonomous Mobile Robot -- Advanced Collision Avoidance System with Real-Time Proximity Detection Cloud-Driven Notifications and Data Analytics for Enhancing Road Safety and Fleet Management.

Sommario/riassunto

This book presents high-quality papers from the International Conference on Next-Generation Communication and Computing (NGCCOM 2024). It discusses the latest technological trends and advances in major research areas such as 5G and Beyond, Internet of Things (IoT), wireless communications, optical communication, signal processing, image processing, big data, cloud computing, intelligent computing, artificial intelligence and sensor network applications. This book includes the contributions of national and international scientists, researchers and engineers from both academia and the industry. The contents of this book will be useful to researchers, professionals and students alike.
