Sommario/riassunto	Modern technological systems entail risks and uncertainties of hitherto

unknown dimensions. This book discusses the construction of risk and safety within a variety of empirical contexts where technologies and their risk are debated and handled by individuals, groups or organizations. With contributions from leading scholars from Europe and the USA, it presents original theoretical discussions, linked to detailed empirical case studies.

Sommario/riassunto	Digitalisation is leading to a fundamental change in all areas of life. This has advantages, but also undesirable side effects. The project "DiDaT - Digital Data as the Subject of a Transdisciplinary Process" deals with unintended side effects or "unseens" of the digital transformation. In this transdisciplinary process, more than 150 experts from science and practice have developed examples, identified relevant undesirable consequences of the use of digital data and developed socially robust orientations for dealing with them, for the areas of - mobility, - health, - agriculture, - the future of small and medium-sized enterprises (SMEs) and the

- Use of social media

The results of DiDaT are summarised in this white paper.

Die Digitalisierung führt zu einem grundlegenden Wandel aller Lebensbereiche. Das hat Vorteile, aber auch unerwünschte Nebenwirkungen. Mit unbeabsichtigten Nebenwirkungen oder „Unseens“ der digitalen Transformation beschäftigt sich das Projekt „DiDaT – Digitale Daten als Gegenstand eines transdisziplinären Prozesses“. In diesem transdisziplinären Prozess haben über 150 Fachleute aus Wissenschaft und Praxis exemplarisch für die Bereiche

- Mobilität,
- Gesundheit,
- Landwirtschaft,
- Zukunft kleiner und mittlerer Unternehmen (KMU) sowie
- Nutzung Sozialer Medien

relevante unerwünschte Folgen der Nutzung digitaler Daten identifiziert und sozial robuste Orientierungen für den Umgang damit entwickelt.

Die Ergebnisse von DiDaT sind in diesem Weißbuch zusammengefasst.
