TOWARDS A SOCIALLY CONSTITUTED LINGUISTICS; NOTES; BIBLIOGRAPHY; SUBJECT INDEX
Sommarioriassunto	Utterance particles, also known as modal particles or sentence-final particles, form a class of words in Cantonese which is of great descriptive and theoretical interest to students of language. Most utterance particles do not have any semantic content (truth-conditional meaning), and few can be said to have a consistent grammatical

function. They are notorious for being extremely resistant to conventional syntactic and semantic analysis. The aim of this book is to seek a better understanding of utterance particles by concentrating analytical attention on three of them.
