Sommario/riassunto

Abandoning the usual Cold War-oriented narrative of postwar European protest and opposition movements, this volume offers an innovative, interdisciplinary, and comprehensive perspective on two decades of protest and social upheaval in postwar Europe. It examines the mutual influences and interactions among dissenters in Western Europe, the Warsaw Pact countries, and the nonaligned European countries, and shows how ideological and political developments in the East and West were interconnected through official state or party channels as well as a variety of private and clandestine contacts.
