Sommario/riassunto	This new textbook for students and practitioners of surveying and town planning, as well as other built environment professionals with an

interest in the processes of property development, provides a modern view of site assembly, town planning policies and development risk, environment issues, masterplanning and design. The principal focus of the book is on the reuse of urban land, including treatment options, and regeneration of the built environment, whilst not ignoring greenfield development. The book is divided into four parts: (1) the development process and planning policies. (2) site a
