1.

Record Nr.	UNINA990004902280403321
Titolo	NEW short novels, by Jean Stafford, Shelby Foote / Elizabeth Etnier... ; edited by Mary Louise Aswell
Pubbl/distr/stampa	New York : Ballantine Books, c1954
Descrizione fisica	188 p. ; 20 cm
Locazione	FLFBC
Collocazione	VW 13
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2.

Record Nr.	UNISA990000451120203316
Autore	BREZINKA, Wolfgang
Titolo	L' educazione in una società disorientata : contributi alla pratica pedagogica / Wolfgang Brezinka ; traduzione di Lucio Pusci
Pubbl/distr/stampa	Roma : Armando, 1989
Descrizione fisica	207 p. ; 24 cm
Collana	I problemi dell'educazione , Polica
Disciplina	370.19
Soggetti	Educazione e società - Saggi
Collocazione	II.4. Coll.21/ 1(VI B COLL. 63/1)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

3. Record Nr. UNISA996418279303316

Autore	Taira Kazuaki
Titolo	Boundary Value Problems and Markov Processes [[electronic resource]] : Functional Analysis Methods for Markov Processes / / by Kazuaki Taira
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-48788-1
Edizione	[3rd ed. 2020.]
Descrizione fisica	1 online resource (XVII, 502 p. 150 illus.)
Collana	Lecture Notes in Mathematics, , 0075-8434 ; ; 1499
Disciplina	515.35
Soggetti	Probabilities Mathematical analysis Analysis (Mathematics) Operator theory Probability Theory and Stochastic Processes Analysis Operator Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This 3rd edition provides an insight into the mathematical crossroads formed by functional analysis (the macroscopic approach), partial differential equations (the mesoscopic approach) and probability (the microscopic approach) via the mathematics needed for the hard parts of Markov processes. It brings these three fields of analysis together, providing a comprehensive study of Markov processes from a broad perspective. The material is carefully and effectively explained, resulting in a surprisingly readable account of the subject. The main focus is on a powerful method for future research in elliptic boundary value problems and Markov processes via semigroups, the Boutet de Monvel calculus. A broad spectrum of readers will easily appreciate the stochastic intuition that this edition conveys. In fact, the book will provide a solid foundation for both researchers and graduate students in pure and applied mathematics interested in functional analysis,

partial differential equations, Markov processes and the theory of pseudo-differential operators, a modern version of the classical potential theory. .
