ISBN	9783319515687 3319515683
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XXIII, 173 p. 1 illus. in color.)
Disciplina	327.06
Soggetti	International organization Political planning Economic development International Organization Public Policy Development Studies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. History of Development: Towards Human Development -- 2. Institutionalisation of Development Concepts -- 3. Measurement of Development: Predecessors of the Human Development Index -- 4. The Human Development Index and Its Evolution -- 5. Happiness in Human Development.
Sommario/riassunto	This book examines the main reasons for the success of the human development approach as an alternative to the economic growth model of development. Is human development theoretically richer, as claimed by its advocates, than any other development concepts including the mainstream? Is its measurement, the human development index (HDI), better than other proposed indices of well-being? Is there anything to be revised to keep its influence for the future? The methodology used throughout this book follows a historical and institutional approach on the ground that human development cannot be understood without taking into account the complexities added by the formation process. Quite often, human development debates are either theoretical and prescriptive or empirical and descriptive. Instead, this book provides a

'meso-analysis' of human development by means of a more pragmatic historical and institutional methodology, avoiding the other two extremes that have already been covered by philosophers and field-experts.
