Sommario/riassunto	An interactive guide to the statistical tools used to solve problems during product and process innovation End to End Data Analytics for Product Development is an accessible guide designed for practitioners in the industrial field. It offers an introduction to data analytics and the design of experiments (DoE) whilst covering the basic statistical concepts useful to an understanding of DoE. The text supports product innovation and development across a range of consumer goods and pharmaceutical organizations in order to improve the quality and speed of implementation through data analytics, statistical design and data prediction. The book reviews information on feasibility screening, formulation and packaging development, sensory tests, and more. The authors – noted experts in the field – explore relevant techniques for data analytics and present the guidelines for data interpretation. In addition, the book contains information on process development and product validation that can be optimized through data understanding, analysis and validation. The authors present an accessible, hands-on

approach that uses MINITAB and JMP software. The book:

- Presents a guide to innovation feasibility and formulation and process development
  - Contains the statistical tools used to solve challenges faced during product innovation and feasibility
  - Offers information on stability studies which are common especially in chemical or pharmaceutical fields
  - Includes a companion website which contains videos summarizing main concepts
- Written for undergraduate students and practitioners in industry, End to End Data Analytics for Product Development offers resources for the planning, conducting, analyzing and interpreting of controlled tests in order to develop effective products and processes.

Sommario/riassunto	Conflict and Peace in Central Eurasia combines theory with in-depth description and systematic analyses of ethnoterritorial conflict and coexistence in Central Eurasia. Central Eurasia is at the heart of the Eurasian continent around the Caspian Sea. Much of this macro-region is made up of the post-Soviet republics in Central Asia and the Caucasus, but it also covers other areas, such as parts of Russia and Iran. Central Eurasia is subject to a number of ethnoterritorial conflicts. Yet at the same time, a large number of ethnic groups, speaking different languages and following different religions, coexist peacefully in this macro-region. Babak Rezvani explains ethno-territorial conflicts not only by focusing on these conflicts but also by comparing all cases of conflict and coexistence in (post-)Soviet Central Asia, the Caucasus and Fereydan, the so-called Iranian little Caucasus. Aiming at formulating new theories, this book makes use of qualitative comparative analysis (QCA), as well as case studies and statistical analyses. It provides an innovative and interesting contribution to Eurasian Studies and Conflict Analysis, and at the same time

demonstrates a detailed knowledge of the relevant literature. Based on thorough research, the study offers a deep and insightful history of the areas and conflicts concerned.
