[et al.] -- 'Public consent' or 'scientific citizenship'? What counts as public participation in population-based DNA collections? / Sue Weldon -- Tissue collection and the pharmaceutical industry : investigating corporate biobanks / Graham Lewis.
Sommario/riassunto	Genetic Databases offers a timely analysis of the underlying tensions, contradictions and limitations of the current regulatory frameworks for, and policy debates about, genetic databases. Drawing on original empirical research and theoretical debates in the fields of sociology, anthropology and legal studies, the contributors to this book challenge the prevailing orthodoxy of informed consent and explore the relationship between personal privacy and the public good. They also consider the multiple meanings attached to human tissue and the role of public consultations and commercia

Sommario/riassunto

When Emperor Constantine triggered the rise of a Christian state, he opened a new chapter in the history of Constantinople and Jerusalem. In the centuries that followed, the two cities were formed and transformed into powerful symbols of Empire and Church. For the first time, this book investigates the increasingly dense and complex net of reciprocal dependencies between the imperial center and the navel of the Christian world. Imperial influence, initiatives by the Church, and projects of individuals turned Constantinople and Jerusalem into important realms of identification and spaces of representation. Distinguished international scholars investigate this fascinating development, focusing on aspects of art, ceremony, religion, ideology, and imperial rule. In enriching our understanding of the entangled history of Constantinople and Jerusalem in Late Antiquity, City of Caesar, City of God illuminates the transition between Antiquity, Byzantium, and the Middle Ages.
