

1. Record Nr.	UNISA990000784970203316
Autore	GRASSIVARO GALLO, Pia
Titolo	Figlie d'Africa mutilate : indagini epidemiologiche sull'escissione in Italia / Pia Grassivaro Gallo
Pubbl/distr/stampa	Torino : L'harmattan Italia, copyr.1998
ISBN	88-86664-80-X
Descrizione fisica	199 p., [19] c. di tav. : ill. ; 22 cm
Collana	Logiche sociali
Disciplina	362.830945
Soggetti	Donne immigrate - Assistenza - Italia Deformazioni e mutilazioni <etnologia>
Collocazione	II.5. 3734(XV B 958)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Seguono appendici

2. Record Nr.	UNINA9910483981803321
Autore	Brasselet Jean-Paul
Titolo	Vector fields on singular varieties // Jean-Paul Brasselet, Jose Seade, Tatsuo Suwa
Pubbl/distr/stampa	Heidelberg ; ; New York, : Springer, c2009
ISBN	9783642052057 3642052053
Edizione	[1st ed. 2009.]
Descrizione fisica	1 online resource (XX, 232 p.)
Collana	Lecture notes in mathematics, , 0075-8434 ; ; 1987
Altri autori (Persone)	SeadeJ (Jose) SuwaT <1942-> (Tatsuo)
Disciplina	515.94
Soggetti	Singularities (Mathematics) Vector fields
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The Case of Manifolds -- The Schwartz Index -- The GSV Index -- Indices of Vector Fields on Real Analytic Varieties -- The Virtual Index -- The Case of Holomorphic Vector Fields -- The Homological Index and Algebraic Formulas -- The Local Euler Obstruction -- Indices for 1-Forms -- The Schwartz Classes -- The Virtual Classes -- Milnor Number and Milnor Classes -- Characteristic Classes of Coherent Sheaves on Singular Varieties.
Sommario/riassunto	Vector fields on manifolds play a major role in mathematics and other sciences. In particular, the Poincaré-Hopf index theorem gives rise to the theory of Chern classes, key manifold-invariants in geometry and topology. It is natural to ask what is the 'good' notion of the index of a vector field, and of Chern classes, if the underlying space becomes singular. The question has been explored by several authors resulting in various answers, starting with the pioneering work of M.-H. Schwartz and R. MacPherson. We present these notions in the framework of the obstruction theory and the Chern-Weil theory. The interplay between these two methods is one of the main features of the monograph.
