Sommario/riassunto

Health service human resources are key determinants of health service performance. The human resource is the largest and most expensive input into health care, yet it can be the most challenging to develop. This book examines some of the major challenges facing health care professions in Europe and the potential responses to these challenges. The book analyses how the current regulatory processes and practices related to key aspects of the management of the health professions may facilitate or inhibit the development of effective responses to challenges facing health care systems in Europe.
