Pubbl/distr/stampa	Cham, Switzerland : , : Palgrave Macmillan, , 2025
ISBN	9783031857201 3-031-85720-8
Descrizione fisica	1 online resource (xi, 205 pages)
Disciplina	616.83
Soggetti	Dementia - Diagnosis Dementia - Social aspects Medical Sociology Gerontology Health, Medicine and Society Medical Anthropology Science and Technology Studies Health Policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Targeting Dementia: An Introduction -- Dementia and the Ageing Brain: From the Politics of Anguish to the Politics of Health -- 'Never Mind the Names': Uncertainty and Ambivalence in Accomplishing Diagnosis -- Moral Reasoning and Everyday Ethics in the Memory Clinic -- Affective Relations: Time, Uncertainty and Care -- Awaiting the Night-Side of Life: Risk and the Meanings of Early Detection -- The Sociology of Dementia Diagnosis and the Constituting of Persons.
Sommario/riassunto	As population aging spreads to more parts of the world, dementia is fast becoming one of the most common and feared conditions of our time. Diagnosis has been identified as a key point of intervention for both biomedical and policy agendas. Drawing on ethnographic research spanning more than a decade, this book reflects on observations and recordings of UK memory clinic consultations, interview accounts with clinical staff involved in assessment and diagnosis, internationally

recognised dementia researchers, and people living with dementia and their families both at the point of diagnosis and as their condition progresses. In dialogue with accounts and observations from the field, this book makes the case for the development of a sociology of dementia diagnosis. In doing so, the book progresses a dialectic approach to the study of dementia's construction and experience and contextualises dementia diagnosis within wider networks of meaning and systems of value related to aging, health, and personhood. Alexandra Hillman is Associate Professor of Sociology at the University of Exeter, based within the Wellcome Centre for Cultures & Environments of Health. Her research sits at the intersections of medical sociology and science and technology studies.
