

1. Record Nr.	UNISA990001234960203316
Autore	ARRIANUS, Flavius
Titolo	L'Inde / Arrien ; texte établi et traduit par Pierre Chantraine
Pubbl/distr/stampa	Paris, : Les belles lettres, 1952
Titolo uniforme	Historia indica
Edizione	[2. éd]
Descrizione fisica	90 p. ([23]-83 doppie), 1 carta geografica ripiegata ; 20 cm
Collana	Collection des universités de France
Disciplina	934.05
Collocazione	XV.8. Coll. 1/ 19
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Testo originale a fronte

2. Record Nr.	UNINA9910299823803321
Titolo	Advances in Aerospace Guidance, Navigation and Control : Selected Papers of the Third CEAS Specialist Conference on Guidance, Navigation and Control held in Toulouse / / edited by Joël Bordeneuve-Guibé, Antoine Drouin, Clément Roos
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-17518-1
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (730 p.)
Disciplina	620 629.1 629.8
Soggetti	Aerospace engineering Astronautics Control engineering Aerospace Technology and Astronautics Control and Systems Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Part I: Guidance and Control.- Part II: Estimation and Navigation -- Part III: Atmospheric Applications -- Part IV: Space Applications.
Sommario/riassunto	The two first CEAS (Council of European Aerospace Societies) Specialist Conferences on Guidance, Navigation and Control (CEAS EuroGNC) were held in Munich, Germany in 2011 and in Delft, The Netherlands in 2013. ONERA The French Aerospace Lab, ISAE (Institut Supérieur de l' Aéronautique et de l'Espace) and ENAC (Ecole Nationale de l'Aviation Civile) accepted the challenge of jointly organizing the 3rd edition. The conference aims at promoting new advances in aerospace GNC theory and technologies for enhancing safety, survivability, efficiency, performance, autonomy and intelligence of aerospace systems. It represents a unique forum for communication and information exchange between specialists in the fields of GNC systems design and

operation, including air traffic management. This book contains the forty best papers and gives an interesting snapshot of the latest advances over the following topics: I Control theory, analysis, and design I Novel navigation, estimation, and tracking methods I Aircraft, spacecraft, missile and UAV guidance, navigation, and control I Flight testing and experimental results I Intelligent control in aerospace applications I Aerospace robotics and unmanned/autonomous systems I Sensor systems for guidance, navigation and control I Guidance, navigation, and control concepts in air traffic control systems For the 3rd CEAS Specialist Conference on Guidance, Navigation and Control the International Program Committee conducted a formal review process. Each paper was reviewed in compliance with standard journal practice by at least two independent and anonymous reviewers. The papers published in this book were selected from the conference proceedings based on the results and recommendations from the reviewers.
