

1.	Record Nr.	UNISA990001484670203316
	Autore	DE SANCTIS, Francesco <1817-1883>
	Titolo	Storia della letteratura italiana / Francesco De Sanctis ; a cura di Benedetto Croce
	Pubbl/distr/stampa	Bari : Laterza, 1925
	Edizione	[Nuova ed]
	Descrizione fisica	2. v. ; 21 cm
	Collocazione	850.9 des
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	<<vol. 1.>> : 427 p. - <<vol. 2.>> : 463 p.
2.	Record Nr.	UNINA9910829016203321
	Titolo	Future U.S. workforce for geospatial intelligence / / Committee on the Future U.S. Workforce for Geospatial Intelligence, Board on Earth Sciences and Resources, Division on Earth and Life Studies, Board on Higher Education and Workforce Policy and Global Affairs, National Research Council of the National Academies
	Pubbl/distr/stampa	Washington : , : National Academies Press, , [2013] ©2013
	ISBN	0-309-26865-6
	Descrizione fisica	1 online resource (185 p.)
	Disciplina	910.285
	Soggetti	Geospatial data - Government policy - United States Geospatial data - Technological innovations Employees - Training of - Government policy - United States
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.

Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Core Areas of Geospatial Intelligence -- Emerging Areas of Geospatial Intelligence -- Availability of Experts -- Current and Anticipated Gaps in Expertise -- Current Training Programs -- Building Knowledge and Skills -- References.
Sommario/riassunto	We live in a changing world with multiple and evolving threats to national security, including terrorism, asymmetrical warfare (conflicts between agents with different military powers or tactics), and social unrest. Visually depicting and assessing these threats using imagery and other geographically-referenced information is the mission of the National Geospatial-Intelligence Agency (NGA). As the nature of the threat evolves, so do the tools, knowledge, and skills needed to respond. The challenge for NGA is to maintain a workforce that can deal with evolving threats to national security, ongoing scientific and technological advances, and changing skills and expectations of workers. Future U.S. Workforce for Geospatial Intelligence assesses the supply of expertise in 10 geospatial intelligence (GEOINT) fields, including 5 traditional areas (geodesy and geophysics, photogrammetry, remote sensing, cartographic science, and geographic information systems and geospatial analysis) and 5 emerging areas that could improve geospatial intelligence (GEOINT fusion, crowdsourcing, human geography, visual analytics, and forecasting). The report also identifies gaps in expertise relative to NGA's needs and suggests ways to ensure an adequate supply of geospatial intelligence expertise over the next 20 years.
