| Sommario/riassunto      | This book essentially builds upon Entessar & Afrasiabi's Iran Nuclear Negotiations (Rowman & Littlefield, October 2015), focusing this time on the final nuclear agreement, the ensuing debates around it, and its global and regional ramifications especially in the Middle East.                                                                                                                                                                                                                                                                                                        |
