Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Heart Failure -- Cardiac Hypertrophy -- Cardiac Arrhythmias -- Valvular Heart Disease -- Coronary Heart Disease -- Management of Pericarditis -- Hypertension -- Atherosclerosis and hyperlipidemia -- Cardiovascular Conditions of Childhood -- Sudden Cardiac Death -- Peripheral artery disease.
Sommario/riassunto	The present book covers the basic principles of cardiovascular physiology, pathophysiology and advanced pharmacology with particular emphasis on cellular mechanisms of drug action. It provides an update on the progress made in several aspects of cardiovascular diseases so that it might kindle scientists and clinicians alike in furthering basic and translational research. In addition, the book is expected to fill imperative gaps in understanding and optimally treating cardiovascular disease.
