	Sommario/riassunto	Paul Milliman's The Slippery Memory of Men is the first monograph on the role played by the early fourteenth-century trials between Poland

and the Teutonic Knights in the restoration of the Polish kingdom. It is also only the second English-language monograph on this important transitional period in Polish history and the first in over 40 years. Milliman first analyzes the thirteenth-century borderland society of the south Baltic littoral, especially in Pomerania, and then uses the lengthy testimonies of over 150 witnesses from the fourteenth-century trials to examine the role of the memory of this borderland in informing the witnesses' views of where the kingdom of Poland was as well as who should be included within its boundaries.

Sommario/riassunto	The reign of the emperor Constantine (306-337) was as revolutionary for the transformation of Rome's Mediterranean empire as that of Augustus, the first emperor three centuries earlier. The abandonment of Rome signaled the increasing importance of frontier zones in northern and central Europe and the Middle East. The foundation of Constantinople as a new imperial residence and the rise of Greek as the language of administration previewed the establishment of a separate eastern Roman empire. Constantine's patronage of Christianity required both a new theology of the Christian Trinity and a new political image of a Christian emperor. Raymond Van Dam explores and interprets each of these events. His book complements accounts of the role of Christianity by highlighting ideological and cultural aspects of the transition to a post-Roman world.

Sommario/riassunto	'A valuable contribution to our collective knowledge about governance, poverty and the environment' Frances Seymour, World Resources Institute'Detailed and realistic documentation of contemporary development and governance relationships and trends' Melissa Leach, Institute of Development StudiesThere are growing signs that development work by governments, aid agencies and non-government

organisations ignores the fact that environmental quality matters to the poor. There are also indications that some environmental work is pushing 'people-out' protection methodologies. Yet recently, an extensiv
