|-------------------------|---|
| 1. Record Nr. | UNISA990001926400203316 |
| Autore | SPALTRO, Enzo |
| Titolo | Gruppi e cambiamento / Enzo Spaltro |
| Pubbl/distr/stampa | Milano : Etas Kompass, 1970 |
| Descrizione fisica | 284 p. ; 23 cm |
| Collana | Uomo e società ; 15 |
| Collocazione | VI Soc Coll N 1/15
II.5. 5666(VI Soc N 34) |
| Lingua di pubblicazione | Italiano |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |

| 2. Record Nr. | UNINA9910830225803321 |
| Autore | Mohammadi S (Soheil) |
| Titolo | Multiscale biomechanics : theory and applications / / Soheil Mohammadi |
| Pubbl/distr/stampa | Hoboken, NJ : , : John Wiley & Sons Ltd., , [2023]
©2023 |
| ISBN | 1-119-03373-X
1-119-03371-3 |
| Descrizione fisica | 1 online resource (557 pages) |
| Disciplina | 571.43 |
| Soggetti | Biomechanics |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Intro -- Multiscale Biomechanics -- Contents -- Preface -- List of Abbreviations -- Part I Introduction -- 1 Introduction -- 1.1 Introduction to Biomechanics -- 1.2 Biology and Biomechanics -- 1.3 Types of Biological Systems -- 1.3.1 Biosolids -- 1.3.2 Biofluids -- |

1.3.3 Biomolecules -- 1.3.4 Synthesized Biosystems -- 1.4
 Biomechanical Hierarchy -- 1.4.1 Organ Level -- 1.4.2 Tissue Level --
 1.4.3 Cellular and Lower Levels -- 1.4.4 Complex Medical Procedures
 -- 1.5 Multiscale/Multiphysics Analysis -- 1.6 Scope of the Book --
 Part II Analytical and Numerical Bases -- 2 Theoretical Bases of
 Continuum Mechanics -- 2.1 Introduction -- 2.2 Solid Mechanics --
 2.2.1 Elasticity -- 2.2.2 Plasticity -- 2.2.3 Damage Mechanics -- 2.2.4
 Fracture Mechanics -- 2.2.5 Viscoelasticity -- 2.2.6 Poroelasticity --
 2.2.7 Large Deformation -- 2.3 Flow, Convection and Diffusion --
 2.3.1 Thermodynamics -- 2.3.2 Fluid Mechanics -- 2.3.3 Gas Dynamics
 -- 2.3.4 Diffusion and Convection -- 2.4 Fluid-Structure Interaction --
 2.4.1 Lagrangian and Eulerian Descriptions -- 2.4.2 Fluid-Solid
 Interface Boundary Conditions -- 2.4.3 Governing Equations in the
 Eulerian Description -- 2.4.4 Coupled Lagrangian-Eulerian (CLE) --
 2.4.5 Coupled Lagrangian-Lagrangian (CLL) -- 2.4.6 Arbitrary
 Lagrangian-Eulerian (ALE) -- 3 Numerical Methods -- 3.1 Introduction
 -- 3.2 Finite Difference Method (FDM) -- 3.2.1 One-Dimensional FDM
 -- 3.2.2 Higher Order One-Dimensional FDM -- 3.2.3 FDM for Solving
 Partial Differential Equations -- 3.3 Finite Volume Method (FVM) -- 3.4
 Finite Element Method (FEM) -- 3.4.1 Basics of FEM Interpolation --
 3.4.2 FEM Basis Functions/Shape Functions -- 3.4.3 Properties of the
 Finite Element Interpolation -- 3.4.4 Physical and Parametric
 Coordinate Systems -- 3.4.5 Main Types of Finite Elements -- 3.4.6
 Governing Equations of the Boundary Value Problem.
 3.4.7 Numerical Integration -- 3.5 Extended Finite Element Method
 (XFEM) -- 3.5.1 A Review of XFEM Development -- 3.5.2 Partition of
 Unity -- 3.5.3 Enrichments -- 3.5.4 Signed Distance Function -- 3.5.5
 XFEM Approximation for Cracked Elements -- 3.5.6 Boundary Value
 Problem for a Cracked Body -- 3.5.7 XFEM Discretisation of the
 Governing Equation -- 3.5.8 Numerical Integration -- 3.5.9 Selection of
 Enrichment Nodes for Crack Propagation -- 3.5.10 Incompatible Modes
 of XFEM Enrichments -- 3.5.11 The Level Set Method for Tracking
 Moving Boundaries -- 3.5.12 XFEM Tip Enrichments -- 3.5.13 XFEM
 Enrichment Formulation for Large Deformation Problems -- 3.6
 Extended Isogeometric Analysis (XIGA) -- 3.6.1 Introduction -- 3.6.2
 Isogeometric Analysis -- 3.6.3 Extended Isogeometric Analysis (XIGA)
 -- 3.6.4 XIGA Governing Equations -- 3.6.5 Numerical Integration --
 3.7 Meshless Methods -- 3.7.1 Why Going Meshless -- 3.7.2 Meshless
 Approximations -- 3.7.3 Meshless Solutions for the Boundary Value
 Problems -- 3.8 Variable Node Element (VNE) -- 4 Multiscale Methods
 -- 4.1 Introduction -- 4.2 Homogenization Methods -- 4.2.1
 Introduction -- 4.2.2 Representative Volume Element (RVE) -- 4.2.3
 Mathematical Homogenization -- 4.2.4 Computational Homogenization
 -- 4.3 Molecular Dynamics (MD) -- 4.3.1 Introduction -- 4.3.2
 Statistical Mechanics -- 4.3.3 MD Equations of Motion -- 4.3.4 Models
 for Atomic Interactions - MD Potentials -- 4.3.5 Measures for
 Determining the State of MD Systems -- 4.3.6 Stress Computation in
 MD -- 4.3.7 Molecular Statics -- 4.3.8 Sample MD Simulation of a
 Polymer -- 4.4 Sequential Multiscale Method -- 4.4.1 Introduction --
 4.4.2 Multiscale Modelling of CNT Reinforced Concrete -- 4.4.3
 Molecular Dynamics Simulation of CNTs -- 4.4.4 Simulation of CNT-
 Reinforced Calcium Silicate Hydrate -- 4.4.5 Micromechanical
 Simulation of CNT-Reinforced Cement.
 4.4.6 Mesoscale Simulation of CNT-Reinforced Concrete -- 4.4.7
 Macroscale Simulation of CNT-Reinforced Concrete -- 4.5 Concurrent
 Multiscale Methods -- 4.5.1 Introduction -- 4.5.2 Quasi-Continuum
 Method (QC) -- 4.5.3 Bridging Domain Method (BDM) -- 4.5.4 Bridging
 Scale Method (BSM) -- 4.5.5 Disordered Concurrent Multiscale Method

(DCMM) -- 4.5.6 Variable Node Multiscale Method (VNMM) -- 4.5.7 Enriched Multiscale Method (EMM) -- Part III Biomechanical Simulations -- 5 Biomechanics of Soft Tissues -- 5.1 Introduction -- 5.2 Physiology of Soft Tissues -- 5.2.1 Soft Tissues, Skin -- 5.2.2 Artery -- 5.2.3 Heart Leaflet -- 5.2.4 Brain Tissue -- 5.3 Hyperelastic Models of Soft Tissues -- 5.3.1 Introduction -- 5.3.2 Description of Deformation and Definition of Invariants -- 5.3.3 Isotropic neo-Hookean Hyperelastic Model -- 5.3.4 Isotropic Mooney-Rivlin Hyperelastic Model -- 5.3.5 Hyperelastic Models for Multiscale Simulation of Tendon -- 5.3.6 Anisotropic Hyperelastic Models for Fibrous Tissues -- 5.3.7 Polyconvex Undamaged Functions for Fibrous Tissues -- 5.3.8 Damaged Soft Tissue -- 5.4 Multiscale Modelling of Undamaged Tendon -- 5.4.1 Fibril Scale -- 5.4.2 Fibre Scale -- 5.4.3 Tissue Scale -- 5.5 Multiscale Analysis of a Human Aortic Heart Valve -- 5.5.1 Introduction -- 5.5.2 Organ Scale Simulation -- 5.5.3 Simulation in the Tissue Scale -- 5.5.4 Cell Scale Analysis -- 5.6 Modelling of Ligament Damage -- 5.7 Modelling of the Peeling Test: Dissection of the Medial Tissue -- 5.8 Healing in Damaged Soft Tissue -- 5.8.1 Introduction -- 5.8.2 Physical Foundation of Tissue Healing -- 5.8.3 Solution Procedure -- 5.8.4 Numerical Analysis -- 5.9 Hierarchical Multiscale Modelling of a Degraded Arterial Wall -- 5.9.1 Definition of the Problem -- 5.9.2 Multiscale Model -- 5.9.3 Hyperelastic Material Models. 5.9.4 Computational Framework of the Hierarchical Multiscale Homogenization -- 5.9.5 Numerical Results -- 5.10 Multiscale Modelling of the Brain -- 5.10.1 Introduction -- 5.10.2 Biomechanics of the Brain -- 5.10.3 Multiscale Modelling of the Brain (neo-Hookean Model) -- 5.10.4 Viscoelastic Modelling of the Brain -- 6 Biomechanics of Hard Tissues -- 6.1 Introduction -- 6.1.1 Hard Tissues -- 6.1.2 Chemical Composition of Bone -- 6.1.3 Multiscale Structure of Bone -- 6.1.4 Bone Remodelling -- 6.1.5 Contents of the Chapter -- 6.2 Concepts of Fracture Analysis of Hard Tissues -- 6.2.1 Numerical Studies of Bone Fracture -- 6.2.2 Constitutive Response of the Bone -- 6.2.3 Poroelastic Nature of Bone Tissues -- 6.2.4 Plasticity and Damage -- 6.2.5 Hyperelastic Response -- 6.3 Simulation of the Femur Bone at Multiple Scales -- 6.3.1 Microscale Simulation of the Trabecular Bone -- 6.3.2 Two-dimensional XFEM Mesoscale Fracture Simulation of the Cortical Bone -- 6.3.3 Macroscale Simulation of the Femur -- 6.4 Healing in Damaged Hard Tissue -- 6.4.1 Introduction -- 6.4.2 Physical Foundation of Bone Tissue Healing -- 6.4.3 Solution Procedure -- 6.4.4 Numerical Analysis -- 7 Supplementary Topics -- 7.1 Introduction -- 7.2 Shape Memory Alloy (SMA) Stenting of an Artery -- 7.2.1 Stenting Procedures -- 7.2.2 SMA Constitutive Equations -- 7.2.3 Contact Mechanics -- 7.2.4 Modelling of Stenting -- 7.2.5 Basics of Modelling -- 7.3 Multiscale Modelling of the Eye -- 7.4 Pulsatile Blood Flow in the Aorta -- 7.4.1 Description of the Problem -- 7.5 Shape Memory Polymer Drug Delivery System -- 7.6 Artificial Intelligence in Biomechanics -- 7.6.1 Artificial Intelligence and Machine Learning -- 7.6.2 Deep Learning -- 7.6.3 Physics-Informed Neural Networks (PINNs) -- 7.6.4 Biomechanical Applications of Artificial Intelligence -- References -- Index -- EULA.
