Sommario/riassunto	In quantity and importance, private standards are rapidly taking over the role of public norms in the international and national regulation of product safety. This book provides a comprehensive overview of the rise, role and status of these private product safety standards in the legal regulation of integrating markets. In international and regional trade law as in European and American constitutional and administrative law, tort law and antitrust law, the book analyses the

ways in which legal systems can and do recognise private norms as 'law.' This sociological question of law's recognition of private governance is indissolubly connected with a normative question of democratic theory: can law recognize legal validity and democratic legitimacy outside the constitution, without constitutional political institutions and beyond the nation state? Or: can law 'constitute' private transnational governance? The book offers the first systematic treatment of European, American and international 'standards law' in the English language, and makes a significant contribution to the study of the processes of globalization and privatization in social and legal theory. For the thesis on which this book was based Harm Schepel was awarded the first EUI Alumni Prize for the "best interdisciplinary and/or comparative thesis on European issues" written at the EUI in recent years

Sommario/riassunto

Due to the widespread use of surveys in agricultural resources estimation there is a broad and recognizable interest in methods and techniques to collect and process agricultural data. This book brings together the knowledge of academics and experts to increase the dissemination of the latest developments in agricultural statistics. Conducting a census, setting up frames and registers and using administrative data for statistical purposes are covered and issues arising from sample design and estimation, use of remote sensing, management of data quality and dissemination and analysis of
