Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Introduction; 1. Trends; 2. Lessons; 3. Foundations; 4. Measurement; 5. Design; Glossary; References; About the Authors; Index
Sommario/riassunto	"Written for those who design, redesign, and assess writing programs, Very Like a Whale is an intensive discussion of writing program assessment issues. Taking its title from Hamlet, the book explores the multifaceted forces that shape writing programs and the central role these programs can and should play in defining college education. Given the new era of assessment in higher education, writing programs must provide valid evidence that they are serving students, instructors, administrators, alumni, accreditors, and policymakers. This book introduces new conceptualizations associated with assessment, making them clear and available to those in the profession of rhetoric and composition/writing studies. It also offers strategies that aid in gathering information about the relative success of a writing program in achieving its identified goals. Philosophically and historically aligned with quantitative approaches, White, Elliot, and Peckham use case study and best-practice scholarship to demonstrate the applicability of their innovative approach, termed Design for Assessment (DFA). Well

grounded in assessment theory, Very Like a Whale will be of practical use to new and seasoned writing program administrators alike, as well as to any educator involved with the accreditation process"--

#### Sommario/riassunto

Gendered Commodity Chains is the first book to consider the fundamental role of gender in global commodity chains. It challenges long-held assumptions of global economic systems by identifying the crucial role social reproduction plays in production and by declaring the household as an important site of production. In affirming the importance of women's work in global production, this cutting-edge volume fills an important gender gap in the field of global commodity and value chain analysis. With thirteen chapters by an international group of scholars from sociology, anthropology, economics, women's studies, and geography, this volume begins with an eye-opening feminist critique of existing commodity chain literature. Throughout its remaining five parts, Gendered Commodity Chains addresses ways women's work can be integrated into commodity chain research, the forms women's labor takes, threats to social reproduction, the impact of indigenous and peasant households on commodity chains, the rapidly expanding arenas of global carework and sex trafficking, and finally, opportunities for worker resistance. This broadly interdisciplinary volume provides conceptual and methodological guides for academics, graduate students, researchers, and activists interested in the gendered nature of commodity chains.
