Sommario/riassunto

The essence of this book is to shed light on the nature of current educational practices from a variety of theoretical perspectives. Both teachers and their trainers provide a better understanding of teacher training and learning processes. Mutual interrelations and the provision of knowledge between academia and schools are essential for merging discourses and aligning positions, whereby turning practice into theory and theory into practice in today's teaching is vital for suitably responding to multiple issues and increasingly diverse contexts. The array of studies from around the world compiled in this volume allow readers to find common ground, discover shared concerns, and define goals. Studying teaching practice and training in different contexts reveals the state-of-the-art practices and identifies those issues that enable educators to understand the complexities involved. The chapters examine the development of our knowledge and understanding of teaching practices, at the same time as analysing engaging learning environments, the sustainability of learning and teaching practices, and highlighting new practices based on the use of ICTs. The diverse teaching contexts considered in this compilation of international research are organized according to the following topics: Teaching occupational learning and knowledge; Teacher beliefs and reflective thinking; and Innovative teaching procedures. The contributors are Laura Sara Agrati, Dyann Barras, Verónica Basilotta Gómez-Pablos, Benignus Bitu, Robyn Brandenburg, Heather Braund, Michael Cavanagh, Chiou-hui Chou, Jean Clandinin, Leah L.
