Sommario/riassunto

Congenital Heart Defects (CHDs) are the most frequently occurring birth defect, affecting over 25,000 infants a year in the US. This text serves as the definitive reference on the subject, covering all aspects of these malformations. The text includes chapters on the development, epidemiology, genetics, diagnosis, management and prevention of CHDs, and includes additional discussions of the public health and ethical issues of CHDs.

4. Record Nr.	UNISA996392885903316
Autore	Blaggrave Joseph <1610-1682.>
Titolo	Blaggrave's Ephemeris for the year 1659 [[electronic resource]] : with observations on every month, and predictions of a great Monarch now rising, who shall, before seven years are expired, wholly subdue Antichrist, and extend his dominions into the most considerable places of the world. Together with a description of his person, age, and place of birth; with the time when he shall begin this great work. Likewise the amity and enmity of the planets unto each other, during their orbs or rayes: and choice times for visiting of friends, whether male or female, with success. Also the time and manner of curing diseases by sympathy and antipathy. Rules for husbandry; dayly predictions of the vveather; and many other things beneficial for physitians and young students. Calculated for the meridian of London, / / by Jos. Blaggrave of Reading, gent. student in Astrologie and Physick
Pubbl/distr/stampa	London, : Printed by J.C. for the Company of Stationers, [1658]
Descrizione fisica	[96] p. : ill
