1. Record Nr.   UNISA990003200880203316

   Autore   BARRECA, Giuseppina uciana

   Titolo   I procedimenti di istruzione preventiva dopo la riforma : (artt. 692-699
                      cod. proc. civ.) / Giuseppina Luciana Barreca

   Pubbl/distr/stampa Milano : Giuffrè, 2009

   ISBN   88-14-14780-9

   Descrizione fisica 269 p. ; 24 cm

   Collana   Itinerari nel processo civile

   Disciplina   344.4507

   Soggetti   Provvedimenti d'urgenza

   Collocazione   XXVII.1.E 3

   Lingua di pubblicazione Italiano

   Formato   Materiale a stampa

   Livello bibliografico Monografia

2. Record Nr. UNINA9910774893203321

Titolo	Computational approaches to semantic change . Volume 6 / / edited by Nina Tahmasebi [and four others]
Pubbl/distr/stampa	Berlin : , : Language Science Press, , 2021
Descrizione fisica	1 online resource (396 pages)
Collana	Language variation
Disciplina	372.6
Soggetti	Language arts Language arts - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Semantic change - how the meanings of words change over time - has preoccupied scholars since well before modern linguistics emerged in the late 19th and early 20th century, ushering in a new methodological turn in the study of language change. Compared to changes in sound and grammar, semantic change is the least understood. Ever since, the study of semantic change has progressed steadily, accumulating a vast store of knowledge for over a century, encompassing many languages and language families. Historical linguists also early on realized the potential of computers as research tools, with papers at the very first international conferences in computational linguistics in the 1960s. Such computational studies still tended to be small-scale, method-oriented, and qualitative. However, recent years have witnessed a sea-change in this regard. Big-data empirical quantitative investigations are now coming to the forefront, enabled by enormous advances in storage capability and processing power. Diachronic corpora have grown beyond imagination, defying exploration by traditional manual qualitative methods, and language technology has become increasingly data-driven and semantics-oriented. These developments present a golden opportunity for the empirical study of semantic change over both long and short time spans.
