Collocazione	CDE 08.10 (III)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This publication briefly presents six examples of outstanding transnational collaborative projects for the construction sector supported by the EU under its RTD Framework Programmes. By taking innovative approaches to the development and application of building and infrastructural technologies, all are helping to ensure a viable future for the construction industry and contributing to the well-being of every citizen.
