Sommario/riassunto	Meeting the hygiene needs of patients is a fundamental aspect of nursing care. This practical and introductory guide outlines and emphasizes the nursing skills required to meet the essential personal hygiene care needs of patients in various healthcare settings. It explores care of the eyes, ears, mouth, nails and hair, and provides evidence-based rationales for each procedure. Methods of washing the patient are discussed, and bed-making and patient positioning is explored. Each chapter provides the necessary anatomy and physiology, as well as common conditions, safety issues,
