| Sommario/riassunto | As Editor-in-Chief of the journal Diabetology, I am pleased to announce the Special Issue "Diabetology: Feature Papers 2021" is now published in book format. Diabetology (ISSN 2673-4540) is an international, peer-reviewed scientific open access journal that provides an advanced forum for studies related to epidemiology, etiology, pathophysiology, pathogenesis, management, complications, and prevention of diabetes, including the molecular, biochemical, and |

physiological aspects of diabetes. In this Special Issue, "Feature Papers", we aim to publish outstanding contributions in the main fields covered by the journal, which will make a great contribution to the community. This book covers the whole spectrum of diabetology from risk screening, risk markers, pathways of disease in type 1 diabetes and insulin treatment, and management of the disease and comorbidities.
