Sommario/riassunto	It is rare that a series can claim a unique status but Advances in Photochemistry is alone in providing one of the only forums for critical and authoritative evaluation of advances in the discipline of photochemistry. Founded in 1963, the series has provided an open forum for pioneers in the field to expand and explore new and radical ideas at the forefront of photochemical research, with each new volume providing a stimulating review of the latest breakthrough and theories in this rapidly developing field. Covering areas as diverse as photochemistry's uses and applications in materials science
