

1. Record Nr.	UNISA990003517630203316
Autore	STANCO, Michele
Titolo	Il caos ordinato : tensioni etiche e giustizia poetica in Shakespeare / Michele Stanco
Pubbl/distr/stampa	Roma : Carocci, 2009
ISBN	978-88-430-4981-3
Descrizione fisica	191 p. ; 22 cm
Collana	Lingue e letterature Carocci ; 102
Disciplina	822.33
Soggetti	Shakespeare, William Opere Temi [:] Giustizia
Collocazione	VII.3.B. 2148
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910289346703321
Autore	Gabrys Jennifer
Titolo	Digital rubbish : a natural history of electronics / / Jennifer Gabrys
Pubbl/distr/stampa	Ann Arbor, MI : , : University of Michigan Press, , 2013 ©2011
ISBN	9780472900299 0472900293 9780472035373 0472035371
Descrizione fisica	1 online resource (ix, 225 pages) : illustrations; PDF, digital file(s)
Collana	Digitalculturebooks
Disciplina	363.7288
Soggetti	Electronic waste Electronic apparatus and appliances - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	<p>This is a study of the material life of information and its devices; of electronic waste in its physical and electronic incarnations; a cultural and material mapping of the spaces where electronics in the form of both hardware and information accumulate, break down, or are stowed away. Electronic waste occurs not just in the form of discarded computers but also as a scatter of information devices, software, and systems that are rendered obsolete and fail. Where other studies have addressed "digital" technology through a focus on its immateriality or virtual qualities, Gabrys traces the material, spatial, cultural, and political infrastructures that enable the emergence and dissolution of these technologies. In the course of her book, she explores five interrelated "spaces" where electronics fall apart: from Silicon Valley to Nasdaq, from containers bound for China to museums and archives that preserve obsolete electronics as cultural artifacts, to the landfill as material repository. All together, these sites stack up into a sedimentary record that forms the "natural history" of this study. Digital Rubbish: A Natural History of Electronics describes the materiality of electronics from a unique perspective, examining the multiple forms of</p>

waste that electronics create as evidence of the resources, labor, and imaginaries that are bundled into these machines. By drawing on the material analysis developed by Walter Benjamin, this natural history method allows for an inquiry into electronics that focuses neither on technological progression nor on great inventors but rather considers the ways in which electronic technologies fail and decay. Ranging across studies of media and technology, as well as environments, geography, and design, Jennifer Gabrys pulls together the far-reaching material and cultural processes that enable the making and breaking of these technologies.
