

1. Record Nr.	UNISA990003521920203316
Autore	Commissione europea : . Direzione generale Ricerca
Titolo	EU research fighting the three major deadly diseases : HIV/AIDS, malaria and tuberculosis : 1. edition EU projects 2007-2010 / European Commission, Directorate-General for Research
Pubbl/distr/stampa	Luxembourg : Publications office of the European Union, 2010
ISBN	978-92-79-15707-3
Descrizione fisica	191 p. : ill. ; 21 cm
Collana	European Research Area. Health & life science
Disciplina	616.905
Soggetti	Malattie contagiose - Prevenzione - Paesi dell'Unione europea Malattie infettive - Prevenzione - Paesi dell'Unione europea
Collocazione	CDE 18.01 (XLIX)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	In cop.: Project information
Sommario/riassunto	<p>The global emergency caused by HIV/AIDS, Malaria and Tuberculosis requires new approaches to confront the three major killing diseases around the world that are the origin and the consequence of serious poverty. In response to this emergency, The European Union provides a comprehensive approach in a wide range of policy areas, including trade, development and research. Research on HIV/AIDS, Malaria and Tuberculosis focuses on collaborative research at World level, developing new therapies, diagnostic and preventive tools. The Programme is sponsoring research on the entire spectrum, from basic molecular research through to preclinical tests and proof-of-principle studies. Research efforts confront the three diseases at the global level, but also address specific European aspects. Structures that were successfully built under the FP6 (2002-2006) are reinforced and complemented in the FP7. This catalogue shows the projects currently financed by the European Commission's Seventh Research Framework Programme (FP7) since 2007 up to 2010, aiming at combating these three major killer diseases: HIV/AIDS, Malaria and Tuberculosis.</p> <p>[abstract tratto dalla pubblicazione]</p>
