Sommario/riassunto	The unemployment rate for young people aged between 16 and 24 years in the EU27 is twice as high as the overall rate of unemployment. The recession has exacerbated this problem significantly. Foundation Findings provide pertinent background information and policy pointers for all actors and interested parties engaged in the current European debate on the future of social policy. The contents are based on Foundation research and reflect its autonomous and tripartite structure. (Abstract tratto dalla pubblicazione)
