Sommario/riassunto	For nearly three decades, scholars and policymakers have placed considerable stock in judicial reform as a panacea for the political and economic turmoil plaguing developing countries. Courts are charged with spurring economic development, safeguarding human rights, and even facilitating transitions to democracy. How realistic are these expectations, and in what political contexts can judicial reforms deliver their expected benefits? This book addresses these issues through an

examination of the politics of the Egyptian Supreme Constitutional Court, the most important experiment in constitutionalism in the Arab world. The Egyptian regime established a surprisingly independent constitutional court to address a series of economic and administrative pathologies that lie at the heart of authoritarian political systems. Although the Court helped the regime to institutionalize state functions and attract investment, it simultaneously opened new avenues through which rights advocates and opposition parties could challenge the regime. The book challenges conventional wisdom and provides insights into perennial questions concerning the barriers to institutional development, economic growth, and democracy in the developing world.

Sommario/riassunto

In Taking Root, Latin American women of Jewish descent, from Mexico to Uruguay, recall their coming of age with Sabbath candles and Hebrew prayers, Ladino songs and merengue music, Queen Esther and the Virgin of Guadalupe. Rich and poor, Sephardi and Ashkenazi, Jewish immigrant families searched for a new home and identity in predominantly Catholic societies. The essays included here examine the religious, economic, social, and political choices these families have made and continue to make as they forge Jewish identities in the New World. Marjorie Agosin has gathered narr
