Sommario/riassunto

This book argues that at a time when the world is facing environmental and social upheaval, the political establishment has been unwilling to listen and slow to act. This is reflected in a political system that has been incapable of rising to the challenge. Only by governments taking a radical and progressive lead in making changes – imposing them if necessary – can there be any hope of slowing, stopping and then reversing our global catastrophe. Governments hold the prime responsibility in the creation of a virtuous circle of positive action for the climate. Starting from a European perspective, a ten point manifesto explains how this can be done and how we can have hope for the future. The book is a call for action to European governments in the approach to COP26 and when plans for a European Green Deal are being discussed in the EU.
