Sommario/riassunto	The volume describes the history, workings and accomplishments of social dialogue at EU level. Negotiations, consultations and exchanges of information among organisations representing employers and workers (the social partners) and public authorities are an essential element of the European social model and play a key role in defining and implementing EU economic, employment and social policy as well as sectoral policies. The volume also looks at how social dialogue has evolved at the level of individual Member States in response to the economic crisis. [Ed.]
