Sommario/riassunto

This volume investigates the impact of energy technology innovations on economic development and presents new areas of research into the financial economics of energy as well as new studies into valuation, electricity pricing and the economic, regulatory and environmental costs of alternative energy sources. Academics and practitioners take a global perspective and present cases from several countries. The book concentrates on three issues: 1) innovation and shocks in energy markets; 2) environment and renewables and 3) fossil fuel regulation. The book will provide a useful resource for anyone with an academic or business interest in energy and value issues. This is the fourth volume in a series on energy organized by the Center for Energy and Value Issues (CEVI). The previous volumes in the series include Financial Aspects in Energy (2011), Energy Economics and Financial Markets (2012) and Perspectives on Energy Risk (2014).

Nota di contenuto

Machine generated contents note: A New Approach to Counting Sexual Assault, Sexual Harassment, and Gender Discrimination -- Fielding the RAND Military Workplace Study Survey -- Top-Line Results from the RAND Military Workplace Study -- The Percentage of Active-Duty Men and Women Experiencing Sexual Assault and Harassment -- Time Trends on Unwanted Sexual Contact and Sexual Harassment Measures -- Comparing Results Across the Two Survey Instruments -- Implications of the Top-Line Results -- Next Steps.

Sommario/riassunto

In early 2014, the Department of Defense Sexual Assault Prevention and Response Office asked the RAND National Defense Research Institute to conduct an independent assessment of sexual assault, sexual harassment, and gender discrimination in the military -- an assessment last conducted in 2012 by the department itself with the Workplace and Gender Relations Survey of Active Duty Personnel. Separately, the Coast Guard requested that we expand the 2014 study to include an assessment of its active and reserve force. This report provides initial top-line active-duty Coast Guard estimates from the resulting RAND Military Workplace Study, which invited close to 560,000 service members to participate in a survey fielded in August and September of 2014.
