

1.	Record Nr.	UNISA990005941620203316
	Titolo	Psicologia del turismo: prospettive future : un percorso di ricerca-formazione nazionale interdisciplinare : scritti in onore di Marcello Cesa-Bianchi / a cura di Antonietta Albanese e Carlo Cristini
	Pubbl/distr/stampa	Milano : Angeli, 2007
	Descrizione fisica	213 p. ; 23 cm
	Disciplina	380.14591
	Soggetti	Turismo - Psicologia
	Collocazione	380.145 PSI 1
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910639891903321
	Titolo	Blast Injury Science and Engineering : A Guide for Clinicians and Researchers / / edited by Anthony M. J. Bull, Jon Clasper, Peter F. Mahoney
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
	ISBN	3-031-10355-6
	Edizione	[2nd ed. 2022.]
	Descrizione fisica	1 online resource (514 pages)
	Disciplina	362.19719
	Soggetti	Emergency medicine Surgery Emergency Medicine
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Preface: A history of blast injury science and engineering -- Part I Basic

science and engineering -- Part II Weapons effects and forensics --
Part III Clinical problems -- Part IV Modelling blast and blast mitigation
-- Part V Application and innovation -- Part VI Rehabilitation. .

Sommario/riassunto

This heavily revised second edition provides a comprehensive multi-disciplinary resource on blast injuries. It features detailed information on the basic science, engineering, and medicine associated with blast injuries. Clear, easy to understand descriptions of the basic science are accompanied by case studies of a variety of clinical problems including heterotopic ossification, hearing damage, and traumatic brain injury, enabling the reader to develop a deep understanding of how to appropriately apply the relevant science into their clinical practice. The use of prosthetics, orthotics and osseointegration in rehabilitation is also covered. Blast Injury Science and Engineering: A Guide for Clinicians and Researchers is a valuable interdisciplinary text primarily focused towards clinical medical professionals and trainees seeking to develop a thorough understanding of injury mechanisms, and the latest treatment techniques. In addition, this resource is of use to individuals in other fields whose work centres around blast injury science such as injury mitigation researchers, military scientists and engineers.
