

1. Record Nr.	UNISA990005956000203316
Autore	LANZI, Alessio
Titolo	Diritto penale tributario / Alessio Lanzi, Paolo Aldrovandi
Pubbl/distr/stampa	[Padova] : Cedam, 2014
ISBN	978-88-13-34052-0
Descrizione fisica	VIII, 382 p. ; 24 cm
Altri autori (Persone)	ALDOVRANDI, Paolo
Disciplina	345.450233
Soggetti	Reati fiscali
Collocazione	XXVI.1.G. 133
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910392734503321
Autore	Tang Yang
Titolo	Atlas of Emergency Neurovascular Imaging / / by Yang Tang
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-43654-3
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (158 pages)
Disciplina	616.0754
Soggetti	Emergency medicine Radiology Emergency Medicine Imaging / Radiology Malalties cerebrovasculars Diagnòstic per la imatge Medicina d'urgència Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa

Livello bibliografico**Nota di bibliografia****Nota di contenuto****Sommario/riassunto****Monografia**

Includes bibliographical references.

1. Acute Stroke Imaging -- 2. Ischemic Stroke Vascular Territory -- 3. Imaging of Stroke Mimics -- 4. Cerebrovenous Thrombosis -- 5. Cerebral Vasculopathy: CNS Vasculitis, RCVS, and PRES -- 6. Miscellaneous Cerebral Vasculopathy -- 7. Traumatic Neurovascular Injury -- 8. Cerebral Aneurysm -- 9. Cerebral Vascular Malformations -- 10. Vascular Emergency of the Head and Neck -- 11. Spinal Vascular Diseases.

Ischemic and hemorrhagic strokes are common neurological emergencies. In recent years, endovascular intervention has become a standard of care in treating acute ischemic stroke, aneurysms, and vascular malformations. As a result, noninvasive CT- and MRI-based techniques have been increasingly used in emergency settings. In this context, neurovascular imaging has become an essential part of the curriculum for training emergency radiologists, stroke neurologists, and vascular neurosurgeons. This book provides a comprehensive review of the entire spectrum of emergent neurovascular imaging, with the emphasis on noninvasive CT angiography (CTA), MR angiography (MRA), and perfusion techniques. It is organized into 11 chapters. The first three chapters address the topics of acute stroke imaging, including algorithms based on recent clinical trials and updated American Heart Association stroke guideline, vascular territories, and stroke mimics. These are followed by discussions of cerebrovenous thrombosis, vasculopathies, aneurysms, and vascular malformations. Remaining chapters are devoted to the traumatic neurovascular injury, as well as the relatively rare albeit important topics of head and neck vascular emergencies and spinal vascular diseases. The book has an image-rich format, including more than 300 selected CT, MRI, or digital subtraction angiography (DSA) images. *Atlas of Emergency Neurovascular Imaging* is an essential resource for physicians and related professionals, residents, and fellows in emergency medicine, neuroradiology, emergency imaging, neurology, and vascular neurosurgery and can successfully serve as a primary learning tool or a quick reference guide.
