

1.	Record Nr.	UNISA990006042750203316
	Autore	GARIBALDI, Franco Temistocle
	Titolo	I sonetti del mare / Franco Temistocle Garibaldi
	Pubbl/distr/stampa	Torino : Renzo Streglio, 1906
	Descrizione fisica	58 p. ; 20 cm
	Disciplina	851.9
	Collocazione	XV.2.MISC. 184
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA990006489460403321
	Autore	Nallino, Carlo Alfonso <1872-1938>
	Titolo	Vita di Maometto / Carlo Alfonso Nallino
	Pubbl/distr/stampa	Roma, : Ist. per l'Oriente, 1946
	Descrizione fisica	38 p. ; 24 cm
	Collana	Pubblicazioni dello Istituto per l'Oriente
	Disciplina	297.63
	Locazione	FSPBC FLFBC
	Collocazione	XIV E 2680 DFT G11 NALC 01
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Ed. postuma di due letture preparate per la stampa nel 1916

3. Record Nr.	UNINA9910566475103321
Autore	Tampa Mircea
Titolo	Personalized Medicine in the Field of Inflammatory Skin Disorders
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (262 p.)
Soggetti	Medicine and Nursing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Skin inflammation is associated with a wide range of conditions which represent major health issues worldwide. Skin and mucosal surfaces represent the primary interface between the human body and the environment, susceptible to numerous factors whose action results in diseases produced by chemical substances, mechanical trauma, microbial agents, radiation, etc. Inflammation, a complex network of interactions between soluble molecules and cells, represents the main modality of the skin's response to injuries. Numerous studies have revealed close links between chronic inflammation, oxidative stress, and carcinogenesis. Chronic inflammation induces the activation of various cell types and an increase in the production of reactive oxygen species, promoting the initiation of a malignant process. Identifying specific biomarkers is essential for understanding molecular mechanisms and developing therapies appropriate to the patient's characteristics. Personalized medicine is an emerging field of medicine that has the potential to predict which therapy will be safe and efficacious for specific patients using an individual's genetic profile to guide decisions regarding the diagnosis, treatment, as well as prevention of disease. This book gathers articles that present recent advancements in research involving the mechanisms that underlie the development of inflammatory skin disorders, skin and mucosal inflammation in general.
