

1.	Record Nr.	UNICAMPANIASUN0034654
	Autore	Sophocles
	Titolo	Trachiniae / Sophocles ; edited by P. E. Easterling
	Pubbl/distr/stampa	Cambridge : Cambridge university, 1982
	ISBN	05-212-8776-6
	Descrizione fisica	xiii, 254 p. ; 20 cm.
	Disciplina	882'.01
	Lingua di pubblicazione	Greco antico
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNISA990006087460203316
	Autore	STEFAN, Paul
	Titolo	Arturo Toscanini / Paul Stefan ; introduzione di Stefan Zweig
	Pubbl/distr/stampa	Roma : Castelvechi, 2015
	ISBN	978-88-6944-220-9
	Descrizione fisica	85 p. ; 22 cm
	Collana	Ritratti
	Disciplina	784.2
	Soggetti	Toscanini, Arturo
	Collocazione	XIII.3.D. 647
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Traduzione dal tedesco di Matteo Chiarini

3. Record Nr.	UNINA9910457197803321
Autore	Nunn Charles L
Titolo	The comparative approach in evolutionary anthropology and biology [[electronic resource] /] / Charles L. Nunn
Pubbl/distr/stampa	Chicago ; ; London, : University of Chicago Press, 2011
ISBN	1-283-31703-6 9786613317032 0-226-09000-0
Descrizione fisica	1 online resource (392 p.)
Disciplina	599.93/8
Soggetti	Evolution (Biology) Human beings - Origin Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Contents -- Preface -- 1. The Importance of Comparison -- 2. Basic Phylogenetic Concepts and "Tree Thinking" -- 3. Reconstructing Ancestral States for Discrete Traits -- 4. Reconstructing Ancestral States for Quantitative Traits -- 5. Modeling Evolutionary Change -- 6. Correlated Evolution and Testing Adaptive Hypotheses -- 7. Comparative Methods to Detect Correlated Evolutionary Change -- 8. Using Trees to Study Biological and Cultural Diversification -- 9. Size, Allometry, and Phylogeny -- 10. Human Cultural Traits and Linguistic Evolution -- 11. Behavior, Ecology, and Conservation of Biological and Cultural Diversity -- 12. Investigating Evolutionary Singularities -- 13. Developing a Comparative Database and Targeting Future Data Collection -- 14. Conclusions and Future Directions -- References -- Index
Sommario/riassunto	Comparison is fundamental to evolutionary anthropology. When scientists study chimpanzee cognition, for example, they compare chimp performance on cognitive tasks to the performance of human children on the same tasks. And when new fossils are found, such as those of the tiny humans of Flores, scientists compare these remains to other fossils and contemporary humans. Comparison provides a way to

draw general inferences about the evolution of traits and therefore has long been the cornerstone of efforts to understand biological and cultural diversity. Individual studies of fossilized remains, living species, or human populations are the essential units of analysis in a comparative study; bringing these elements into a broader comparative framework allows the puzzle pieces to fall into place, creating a means of testing adaptive hypotheses and generating new ones. With this book, Charles L. Nunn intends to ensure that evolutionary anthropologists and organismal biologists have the tools to realize the potential of comparative research. Nunn provides a wide-ranging investigation of the comparative foundations of evolutionary anthropology in past and present research, including studies of animal behavior, biodiversity, linguistic evolution, allometry, and cross-cultural variation. He also points the way to the future, exploring the new phylogeny-based comparative approaches and offering a how-to manual for scientists who wish to incorporate these new methods into their research.
